

Technology to Reopen the World + 2021 Economic & Policy Scenarios

CME Webinar • October 29, 2020 • 1-2 PM

The week before one of the most far-reaching presidential elections in U.S. history, please join us to hear the latest analyses on the technology to reopen the world, economic outlook and policy scenarios.

The keys to revitalizing quickly the debilitated COVID world depend on the election as well as the effectiveness of government-industry collaborations to bring to market cutting-edge technological advances. To resume our life journeys, the world's best minds are developing breakthroughs in mRNA, monoclonal antibodies, molecular engineering, chemical synthesis, drug delivery and rapid green manufacturing as well as innovative materials, medical devices and communication technologies.

Don't miss the insightful visions of experts on policy, the economy, public health and technological issues for therapeutics, vaccines and biomaterials.

Shahira Knight is the deputy managing principal in Deloitte Services Policy & Government Relations group. Previously, she served as the president's top liaison between the White House and Congress and as deputy assistant to the president for Economic Policy and deputy director of the National Economic Council.

Duane Dickson (moderator) is a Vice Chairman and principal in Deloitte Consulting LLP's Energy Resources & Industrials group. He served as a World Economic Forum's Project Advisor and the Forum's Chemical Community Lead, Chemistry and Advanced Materials. He is often quoted at industry media outlets.

Joachim Kohn is Rutgers University Board of Governors Professor of Chemistry; Head, Laboratory for Biomaterials Research; President-Elect, International Union of Societies for Biomaterials Science and Engineering; and Fellow of the National Academy of Inventors.

Kevin Swift is the Chief Economist at the American Chemistry Council, where he analyzes markets, raw materials, trade, tax, energy, innovation, as well as identifying emerging trends for the domestic and global chemical sector. He is the past president of the National Association for Business Economics (NABE).

Panelist from the Global Public Health Group at Johnson & Johnson with focus areas (TB, HIV, MH, STH, and Vaccines) for sustainable and equitable access worldwide.
